ABOUT US

Who we are

Watermark IT is an IT infrastructure company based in Riyadh. We plan, install and support the networks, low current systems and devices that businesses rely on every day.

Our consultants, engineers and technicians take each project from the first site survey through design, supply, installation and testing, and they stay on as your support line after handover.

Mission

To give every client IT infrastructure that is planned properly, built to code and supported long after delivery.

Vision

To be the infrastructure partner businesses in Riyadh call first, for the cabling in their walls and the devices on their desks.

Why clients choose us

Certified engineers

Highly qualified and experienced consultants, engineers and technicians design and sign off every installation.

End-to-end planning

We plan, implement and follow up your IT project, from site survey and design to supply, installation and testing.

Post-delivery support

Technical and engineering support continues after delivery, with a direct line to the engineer who built your system.

SERVICES

What we install and support

One team for the cabling in your walls and the devices on your desks.

IT networking

Structured cabling, switches, Wi-Fi and server rooms built for growth.

Low current / ELV

Fire alarm, PA, intercom and data systems routed and labelled to code.

CCTV surveillance

IP cameras, NVR recording and remote viewing from your phone.

Access control

Card, fingerprint and face readers with attendance reports.

POS systems

Point-of-sale terminals, printers and scanners for retail and restaurants.

Smart homes

Lighting, climate, curtains and security controlled from one app.

Technical support

On-site and remote help, preventive maintenance and annual contracts.

Hardware supply

Computers, servers, printers and network gear from trusted brands.

We stay with the project from planning to the day after handover.

HOW WE WORK

How a project runs

01
Site survey
We visit the site, take measurements and agree on what you need. The survey is free.

02
Design and quotation
A layout, an equipment list and a clear quotation, signed off by an engineer.

03
Supply
Hardware from trusted brands, ordered to the approved design.

04
Installation
Cabling routed, labelled and terminated to code; devices mounted and configured.

05
Testing and handover
Every point tested, documented and walked through with your team.

06
Support
On-site and remote help, preventive maintenance and annual contracts.

Who we work with

- Offices and corporate sites
- Retail stores
- Restaurants and cafés
- Villas and residences
